

Sharp Memorial Hospital and Sharp Mary Birch Hospital for Women & Newborns 2016 CHNA Executive Summary

Overview and Background

Sharp HealthCare (Sharp) has been a long-time partner in the process of identifying and responding to the health needs of the San Diego community. This partnership includes a broad range of hospitals, health care organizations, and community agencies that have worked together to conduct triennial community health needs assessments (CHNAs) over the past 20 years. Previous collaborations among not-for-profit hospitals and other community partners have resulted in numerous well-regarded CHNA reports. Sharp hospitals, including Sharp Memorial Hospital (SMH) and Sharp Mary Birch Hospital for Women & Newborns (SMBHWN), base their community benefit and community health programs on both the findings of these CHNAs and the combination of expertise in programs and services offered and the knowledge of the populations and communities served by their hospitals.

SMH prepared this CHNA for Fiscal Year 2016 (FY 2016) in accordance with the requirements of Section 501(r)(3) within Section 9007 of the Patient Protection and Affordable Care Act (“Affordable Care Act”), and IRS Form 990, Schedule H for not-for-profit hospitals.¹ Per the federal regulations, the SMH 2016 CHNA also includes needs identified for communities served by SMBHWN, as the two hospitals share a license, and report all utilization and financial data as a single entity to the Office of Statewide Health Planning and Development. The SMH 2016 CHNA summarizes the processes and findings for communities served by both hospital entities.

The Sharp Memorial Hospital 2016 Community Health Needs Assessment (CHNA) examines the health needs of the community members it serves in San Diego County (SDC). SMH’s 2016 CHNA process and findings are based on the collaborative Hospital Association of San Diego and Imperial Counties (HASD&IC) CHNA process and findings for SDC. This collaborative process was conducted under the auspices of HASD&IC, and in contract with the Institute for Public Health (IPH) at San Diego State University (SDSU).

The HASD&IC Board of Directors convened a CHNA Committee to plan and implement the collaborative 2016 CHNA process. The CHNA Committee is comprised of representatives from all seven participating hospitals and health care systems:

- Kaiser Foundation Hospital – San Diego
- Palomar Health
- Rady Children’s Hospital – San Diego

¹ See Section 9007(a) of the Patient Protection and Affordable Care Act (“Affordable Care Act”), Pub. L. No. 111-148, 124 Stat.119, enacted March 23, 2010. Notice 2011-52.

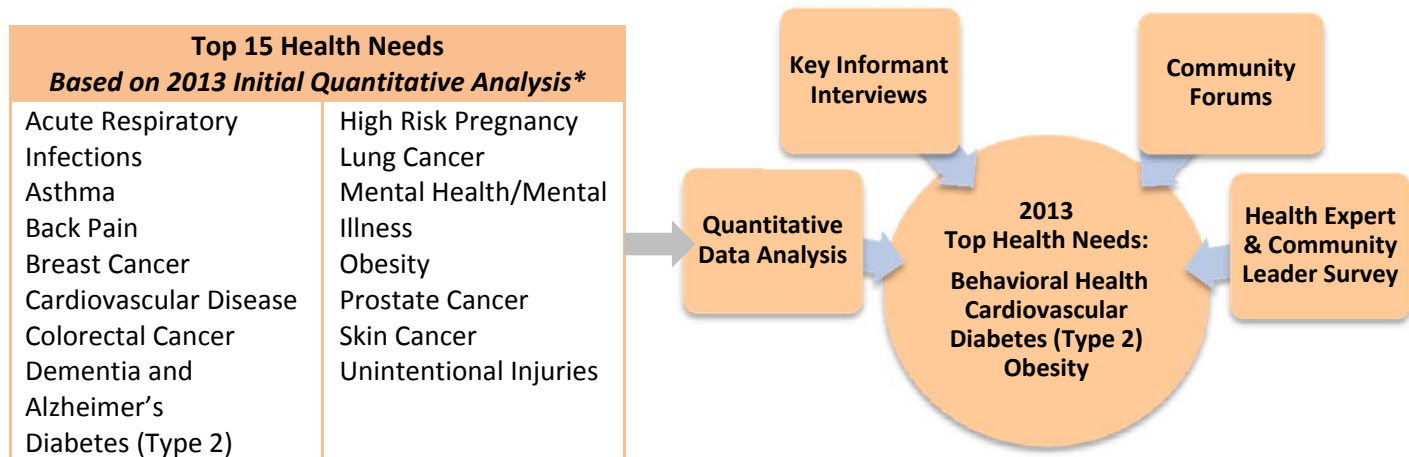

- Scripps Health (Chair)
- Sharp HealthCare (Vice Chair)
- Tri-City Medical Center
- University of California San Diego Health

Under the Affordable Care Act enacted in March, 2010, IRS Code Section 501(r)(3) requires not-for-profit hospitals to conduct a triennial assessment of prioritized health needs for the communities served by its hospital facilities, as well as adopt an implementation plan – a written strategy to address the health needs identified as a result of the CHNA. The CHNA is considered adopted once it has been made widely available to the public. In addition, the CHNA and the implementation plan must be approved by an authorized governing body of the hospital facility.

CHNA Objectives

In recognition of the challenges that health providers, community organizations and residents face in their efforts to prevent, diagnose and manage chronic conditions, the HASD&IC 2016 CHNA process focused on gaining deeper insight into the top health needs identified for SDC through the 2013 CHNA process. **Figure 1** below presents the 2013 CHNA methodology and findings.

Figure 1: 2013 CHNA Methodology and Findings

In 2013, Sharp HealthCare based its individual hospital CHNAs on this collaborative model, and through further outreach and analyses, identified additional health needs for its hospitals. For SMH/SMBHWN, the additional identified needs were senior health and high-risk pregnancy.

Following the collaborative, 2016 HASD&IC CHNA model, SMH's 2016 CHNA processes dove deeper into the priority health needs identified in 2013 (behavioral health, cardiovascular disease, diabetes, high risk pregnancy, obesity and senior health). In addition, SMH included cancer in its CHNA analyses in 2016, given the significance of various forms of cancer identified in 2013 (see Figure 1 above) as well as input from Sharp providers and patients.

Specific objectives of the 2016 CHNA process included:

- Gather in-depth feedback to aid in the understanding of the most significant health needs impacting community members in SDC, particularly Sharp patients.
- Connect the identified health needs with associated social determinants of health to further understand the challenges that community members and Sharp patients – particularly those in communities of high need – face in their attempts to access health care and maintain health and well-being.
- Identify currently available community resources that support identified health conditions and health challenges.
- Provide a foundation of information to begin discussions of opportunities for programs, services and collaborations that could further address the identified health needs and challenges for the community.

Study Area Defined

For the purposes of the collaborative, HASD&IC 2016 CHNA, the study area is the entire County of San Diego due to a broad representation of hospitals in the area. More than three million people live in socially and ethnically diverse SDC. Information on key demographics, socioeconomic factors, access to care, health behaviors, and the physical environment can be found in the full HASD&IC 2016 CHNA report at: <http://hasdic.org>.

The SMH 2016 CHNA examines the communities served by both SMH and SMBHWN. As a specialty hospital providing care for expectant mothers, newborns and women's services, SMBHWN serves the community of San Diego County. Combined with the communities served by SMH, the study area for the SMH 2016 CHNA covers SDC as a whole, including all six regions: central, east, north central, north coastal, north inland and south. **Table 1** below presents the ZIP codes where the majority of SMH/SMBHWN patients reside. **Figure 2** presents key demographics for SDC.

Table 1: SMH 2016 CHNA Primary Communities Served

ZIP Code	Community	ZIP Code	Community
91910	Chula Vista	92107	Ocean Beach
91911	Chula Vista	92109	Pacific Beach
91942	La Mesa	92110	Old Town
91950	National City	92111	Linda Vista
91977	Spring Valley	92114	Encanto
92019	El Cajon	92115	College Area
92020	El Cajon	92117	Clairemont Mesa
92021	El Cajon	92120	Grantville
92040	Lakeside	92123	Serra Mesa
92064	Poway	92124	Tierrasanta
92071	Santee	92126	Mira Mesa
92101	Downtown	92128	Carmel Mtn. Ranch
92102	East San Diego	92129	Rancho Penasquitos
92104	North Park	92154	Otay Mesa
92105	City Heights

Figure 2: Selected Community Health Statistics, SDC²

*Federal Poverty Level (FPL) is a measure of income issued every year by the Department of Health and Human Services. In 2016, the FPL for a family of four was \$24,300.

Recognizing that health needs differ across the region and that socioeconomic factors impact health outcomes, both HASD&IC’s and SMH’s 2016 CHNA processes utilized the Dignity Health Community Need Index (CNI) to identify communities with the highest level of health disparities and needs. **Table 2** below presents primary communities (by

²Source: County of San Diego, HHSA, Community Health Statistics Unit, September 2015

ZIP code) served by SMH/SMBHWN that have especially high need based on their CNI score.

Table 2: SMH 2016 CHNA High-Need Communities, CNI Score > 4.0

ZIP Code	Community
91910, 91911	Chula Vista

Data Collection and Analysis

The HASD&IC 2016 CHNA process and findings significantly informed the SMH 2016 CHNA process and as such are described as applicable throughout this report. For complete details on the HASD&IC 2016 CHNA process, please visit the HASD&IC website at: www.hasdic.org or contact Lindsey Wade at lwade@hasdic.org.

For the collaborative HASD&IC 2016 CHNA process, the IPH employed a rigorous methodology using both community input and quantitative analysis to provide a deeper understanding of barriers to health improvement in SDC. **Figure 3** below provides an overview of the process used to identify and prioritize the health needs for the HASD&IC 2016 CHNA.

Figure 3: HASD&IC 2016 Community Health Needs Assessment Process Map

The 2016 CHNA process began with a comprehensive scan of recent community health statistics in order to validate the regional significance of the top four health needs identified in the HASD&IC 2013 CHNA. Quantitative data for both the HASD&IC 2016 CHNA and SMH 2016 CHNA included 2013 Office of Statewide Health Planning and Development (OSHPD) demographic data for hospital inpatient, emergency department, and ambulatory care encounters to understand the hospital patient population. Clinic data was also gathered from OSHPD’s website and incorporated in order to provide a more holistic view of health care utilization in SDC. Additional variables analyzed in the 2016 CHNA processes are included in **Table 3** below and were analyzed at the ZIP code level wherever possible.

Table 3: Variables Analyzed in the HASD&IC and SMH 2016 CHNA

Secondary Data Variables
Hospital Utilization: Inpatient discharges, ED and ambulatory care encounters (both countywide and for SMH/SMBHWN specifically)
Community Clinic Visits
Demographic Data (socio-economic indicators)
Mortality and Morbidity Data
Regional Program Data (childhood obesity trends and community resource referral patterns)
Social Determinants of Health and Health Behaviors (education, income, insurance, physical environment, physical activity, diet and substance abuse)

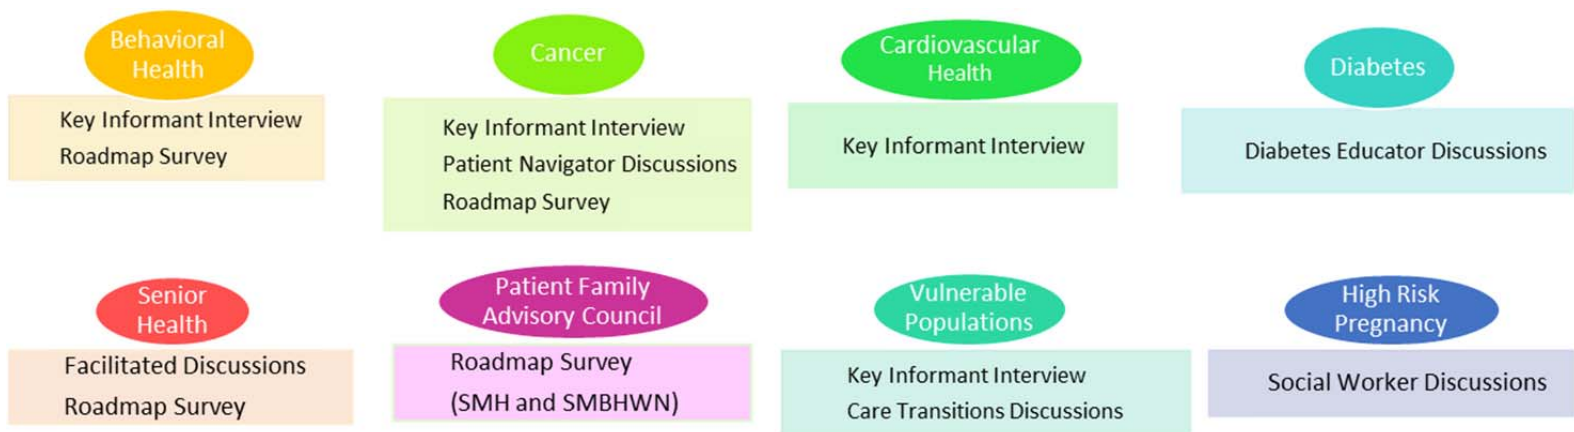

Based on the results of the community health statistics scan and feedback from community partners received during the 2016 CHNA planning process, a number of community engagement activities were conducted across SDC, as well as specific to SMH/SMBHWN, in order to provide a more comprehensive understanding of the identified health needs, including their associated social determinants of health and potential system and policy changes that may positively impact them. In addition, a detailed analysis of how the top health needs impact the health of San Diego residents was conducted. **Figure 4** below outlines the number and type of community engagement activities conducted as part of the collaborative, HASD&IC 2016 CHNA, including: key informant interviews, facilitated discussions with care coordinators (community partner discussions), and community resident input through a Health Access and Navigation Survey.

Figure 4: HASD&IC 2016 CHNA Community Engagement Activities

For the SMH 2016 CHNA, Sharp contracted with IPH to collect additional community input through three primary methods: facilitated discussions, key informant interviews, and the Health Access and Navigation Survey (the “Roadmap” in **Figure 5** below) with patients and community members. This input focused on behavioral health, cancer cardiovascular health, diabetes, high-risk pregnancy, senior health and the needs of highly vulnerable patients and community members. In addition, Sharp conducted specific outreach to members of SMH’s and SMBHWN’s Patient Family Advisory Councils (PFACs) – community members who are also former or current patients. **Figure 5** below outlines the engagement activities specific to the SMH 2016 CHNA. More than 40 Sharp providers and more than 100 patients / community members were reached through these efforts.

Figure 5: SMH 2016 CHNA Community Engagement Activities

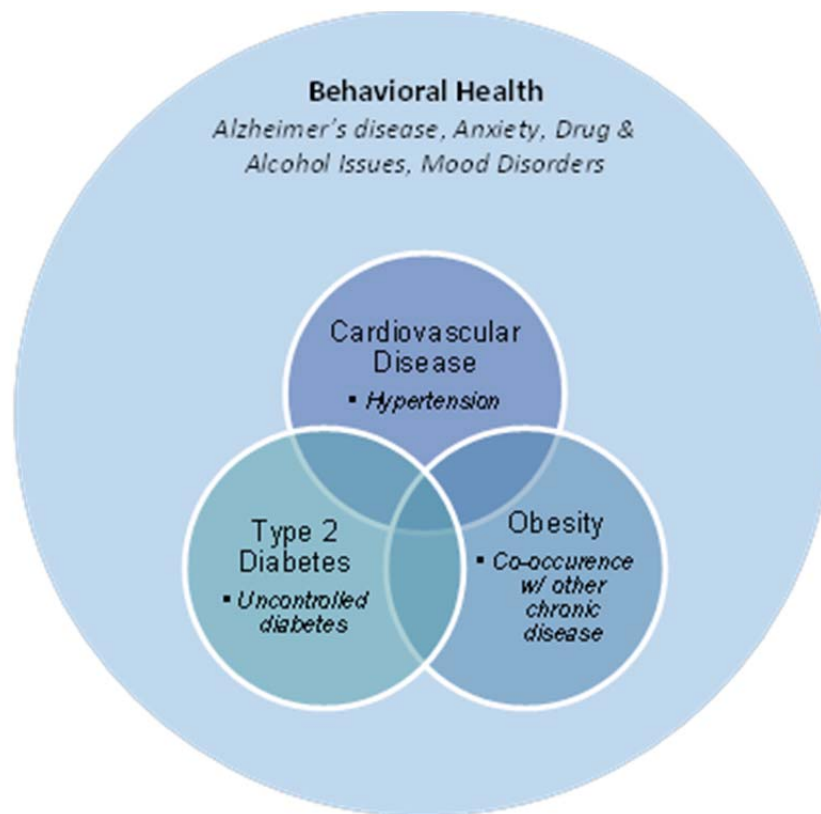

Findings

The collaborative, HASD&IC 2016 CHNA prioritized the top health needs for SDC through application of the following five criteria:

1. Magnitude or Prevalence
2. Severity
3. Health Disparities
4. Trends
5. Community Concern

Using these criteria, a summary matrix translating the 2016 CHNA findings was created for review by the CHNA Committee. As a result, the CHNA Committee identified behavioral health as the number one health need in SDC. In addition, cardiovascular disease, diabetes, and obesity were identified as having equal importance due to their interrelatedness. Health needs were further broken down into priority areas due to the overwhelming agreement among all data sources and in recognition of the complexities within each health need. **Figure 6** below illustrates the prioritization of the top health needs for SDC.

Figure 6: HASD&IC 2016 CHNA Top Health Needs

These results were well-aligned with findings from both the quantitative analysis and community engagement activities conducted as part of the SMH 2016 CHNA.

As the HASD&IC 2016 CHNA process included robust representation from the communities served by SMH/SMBHWN, the findings of the prioritization process apply to the same four priority health needs identified for SMH (behavioral health, cardiovascular, diabetes, obesity). Findings from SMH'S 2016 CHNA continued to prioritize high risk pregnancy and senior health among the top health needs for its community, and, in recognition of the various forms of cancer prioritized in the 2013 CHNA process (See **Figure 1**), as well as discussion with Sharp team members on health issues observed with patients, the SMH 2016 CHNA process identified cancer as a priority community health need to address.

Further, the IPH conducted a content analysis of the input collected through the community engagement activities of the HASD&IC 2016 CHNA process, and found that social determinants of health were a key theme. Ten social determinants were consistently referenced across the different community engagement activities. The importance of these social determinants was also confirmed by quantitative data. Hospital programs and community collaborations have the potential to impact these social determinants, which **Figure 7** lists below in order of priority.

Feedback collected from community engagement activities in SMH's 2016 CHNA process also highlighted the inextricable connection of these social determinants to the health of SMH/SMBHWN's patients and community members.

Figure 7: Social Determinants of Health, HASD&IC 2016 CHNA

Implementation Plan

SMH and SMBHWN developed their FY17-FY20 implementation plan to address the needs identified through the 2016 CHNA process. Many of the programs included in the implementation plan have been in place for several years. In addition, SMH and SMBHWN leadership, Sharp Community Benefit and team members across Sharp are committed to an ongoing evaluation of the programs provided to address the needs of its community members. The FY17-FY20 SMH implementation plan is submitted along with the IRS Form 990, Schedule H, and will be publicly available on Guidestar (<http://www.guidestar.org/>) in the coming months. Categories of programs and activities included in the SMH and SMBHWN FY17-FY20 implementation plan are summarized below:

- *Identified Community Need: Access to Care*
 - Patient Financial Services – PointCare assistance, Public Resource Specialist
 - Community organization collaboration
- *Identified Community Need: Behavioral Health*
 - Psychiatric Evaluation Team (PET) evaluations in the SMH Emergency Department
 - Community education/support programs
- *Identified Community Need: Cancer*
 - Community education and screening programs
 - Analysis and refinement of patient navigation services
 - Community organization collaboration
- *Identified Community Need: Cardiovascular Disease*
 - Community education programs
 - Community organization collaboration
- *Identified Community Need: Diabetes*
 - Community education programs; food-insecure, vulnerable populations
 - Collaboration with community clinics, vulnerable populations
- *Identified Community Need: High Risk Pregnancy, Pre-natal and Post-partum Care, Education and support*
 - Community education programs and support groups, high-risk populations
 - NICU and PSCU programs
 - Community clinic collaboration/coordination
- *Identified Community Need: Obesity*
 - Community education programs – nutrition and physical activity

- *Identified Community Need: Senior Health*
 - Community education, screenings and support for seniors and caregivers; education and support on advanced care options - Senior Resource Center and Senior Health Centers
 - Community organization collaboration: San Diego Food Bank

Conclusion / Next Steps

SMH and SMBHWN are committed to the health and well-being of their community, and the findings of the SMH 2016 CHNA will help inform the activities and services provided to improve the health of their community members. These programs are detailed in SMH's FY17-FY 20 implementation plan, which will be publicly available online at: <http://www.sharp.com/about/community/health-needs-assessments.cfm>.

The 2016 CHNA process generated a list of currently existing resources in SDC that address the health needs identified through the CHNA process. While not an exhaustive list of San Diego's available resources, this information serves as a resource to help continue, refine and create programs that meet the needs of the community.

Sharp will continue to work with HASD&IC and IPH as part of the CHNA Committee to develop and implement Phase 2 of the 2016 CHNA. Phase 2 will focus on continued engagement of community partners to analyze and improve the CHNA process, as well as the hospital programs provided to address the 2016 CHNA findings. In this way, our CHNA work will continue to evolve to meet the needs of our ever-changing community.

In addition, Phase 2 of the CHNA will focus on the development of a multi-hospital and health system collaborative effort to address priority health needs, including a policy agenda to focus and strengthen the role of hospitals as advocates for community health.

The health needs and social determinants of health identified in the 2016 CHNA process will not be resolved with a "quick fix." Rather, they will require time, persistence, collaboration and innovation. It is a journey that the entire Sharp system is committed to, and remains steadfastly dedicated to the care and improvement of health and well-being for all San Diegans.

The complete Sharp Memorial Hospital 2016 Community Health Needs Assessment will be available online at: <http://www.sharp.com/about/community/health-needs-assessments.cfm> or by contacting Sharp HealthCare Community Benefit at: communitybenefits@sharp.com.
