BACKGROUND

The Sharp HealthCare System Residency Program is in the clinical and technological forefront of decentralized hospital pharmaceutical care. Residents are hired and the program is conducted and administered from the ASHP accredited site, Sharp Chula Vista Medical Center. Through multiple highly regarded hospital sites in San Diego County, residents will develop hands-on clinical experience in a friendly environment that is optimal for learning. Unique to this program is the diversity of learning experiences that lead to invaluable opportunities for growth in areas to include, but not limited to: infectious diseases, medicine, emergency medicine, transitions of Care, critical care, neonatal intensive care, and nutritional and metabolic support. Recent additions to the residency program include learning experiences in trauma, oncology, and specialty pharmacy. Additionally, residents will obtain teaching certification, precept pharmacy students, and enjoy the ability to personalize the residency experience to meet their goals and ambitions.
