

GUIDANCE: Outreach and Community Involvement						
NUMBER	DATE	AUTHOR	APPROVED BY	AUDIENCE	USE	PAGE
HRP-005	10/1/2014	Center For Research	Institutional Official	Investigators or Designees	Required: X Elective:	Page 1 of 2

1 PURPOSE

- 1.1 This guidance establishes the procedure for enhancing understanding of human research with participants, potential participants, and their communities and conducting outreach activities for increased involvement to human research participants and their communities.
- 1.2 This guidance begins when a human subjects' research study is initiated at Sharp HealthCare (SHC).
- 1.3 This guidance ends when the outcome of the human subjects' research is disseminated.

2 REVISIONS FROM PREVIOUS VERSION

- 2.1 None.

3 POLICY STATEMENT

- 3.1 To comply with the ethical principal of respect for persons participating in research and maximize their involvement in the research process, including proactive outreach activities.
- 3.2 The Center for Research (CFR) ensures the availability of information and resources to improve community awareness and involvement with research at SHC.

4 RESPONSIBILITIES

- 4.1 The director of research is responsible for ensuring the respect for human participants and their awareness of and involvement in SHC research protocols.
- 4.2 Site clinical research coordinators (CRCs) and designees are responsible for day-to-day assurance of compliance with all aspects of the Human Research Protection Program (HRPP), including participant awareness and outreach activities.
- 4.3 Investigators involved in human research protocols are responsible for maintaining respectful interactions with participants, involving research participants at every stage, enhancing appropriate safeguards, answering questions in a complete and sensitive manner, and participating in outreach and educational activities for participants and their communities.

5 PROCEDURES:

- 5.1 Informed consent form/s (ICF) associated with research activities are to be reviewed and approved by the SHC Institutional Review Board (IRB) to ensure that procedures are in place to facilitate the ability of research participants to ask questions, express concerns, or voice complaints to the CFR, IRB, or investigator.
- 5.2 SHC enhances the understanding of human research with participants, potential participants, and communities, as appropriate, using a variety of methods. These include, among others:
 - 5.2.1 Regular ad hoc printed and online communications.
 - 5.2.2 General and specialized research communications available at Sharp.com/research.
 - 5.2.3 Internal resources for investigators, CRCs and their designees to share with the research community on SharpNet under "Institutional Review Board."
 - 5.2.4 Individual and group meetings and presentations.
 - 5.2.5 Hosted events, such as workshops, seminars, and training courses.
- 5.3 To involve and inform current and future research participants, in accordance with the Belmont principle of Respect for Persons, the CFR maintains a "Research Participants" page on the Sharp.com/Research website. This page provides resources for current and future research participants, including:
 - 5.3.1 The opportunity to submit concerns, trial information, and receive feedback.
 - 5.3.2 Participant Brochure. See *BROCHURE: Should I Take Part in Research? (RP-104)*.
 - 5.3.3 Links to government websites where research information may be obtained (e.g., OHRP, FDA, NIH).
- 5.4 For SHC investigator-initiated research, investigators solicit and incorporate community input as appropriate in the design (including reducing invasiveness), implementation, and dissemination of research. Based on the type of research, investigators may employ one or more of the following methods, among others: (*WORKSHEET: Community Involvement [HRP-341]*).
 - 5.4.1 Planned community sessions
 - 5.4.2 Community advisory groups

GUIDANCE: Outreach and Community Involvement

NUMBER	DATE	AUTHOR	APPROVED BY	AUDIENCE	USE	PAGE
HRP-005	10/1/2014	Center For Research	Institutional Official	Investigators or Designees	Required: X Elective:	Page 2 of 2

- 5.4.3 Participant advocates
- 5.4.4 Partnerships with community-based organizations
- 5.4.5 Community-based participant research design methodologies
- 5.5 Clinical research coordinators (CRCs) or their designees distribute information regarding a safe, confidential, and reliable channel for current, prospective, or past research participants or their designated representatives or their community to discuss concerns, raise questions, obtain information, complaint about the research, or ask questions about rights as a research participant, or provided input on the design of future studies.
 - 5.5.1 This information is disseminated by investigators to all persons who are going to participate in the human research protocol. In addition, this information is posted on Sharp.com/Research website.
 - 5.5.2 Contact information for reporting complaints or concerns is provided in the informed consent, participant brochure, and the Sharp.com/Research website.
 - 5.5.3 Research participants are invited via the Sharp.com/Research website to contact the CFR or IRB staff to provide feedback and/or obtain information about human subjects' research and SHC HRPP activities.
- 5.6 Any form of communication will be acknowledged and forwarded to the appropriate individual within the organization for handling and follow-up. While the CFR and IRB expect a prompt resolution, the time frame is dependent on the complexity of the complaint or concern.
- 5.7 Feedback from investigators and other research community members, the consent process, formal and informal evaluations, and audits are used as input to SHC's HRPP improvements, including community awareness and outreach activities. See *FORM: Education Continuous Quality Improvement (CQI) Assessment (HRP-232)*.
- 5.8 The CFR periodically evaluates its community involvement activities and makes changes, when appropriate, to improve outreach methods; adjust content and materials; and collaborate and educate others on updating such activities.
 - 5.8.1 These evaluations take place in an informal, ongoing manner. IRB Chair, IRB members, IRB staff, and CFR staff will report both positive and negative feedback regarding community awareness and outreach activities to the Director of Research, who tracks the input and recommends changes to improve community involvement.
 - 5.8.2 The Director of Research summarizes the feedback annually to formally evaluate its outreach activities and determine: (*WORKSHEET: Annual Evaluation of SHC HRPP [HRP-342]*)
 - 5.8.2.1 The specific community outreach activities being used; and
 - 5.8.2.2 Whether or not these community outreach activities have an evaluative component, and if so what, if any, changes in the outreach activities have resulted from these.
